

WANTED:

Grindings, Spills, Slag, Dross, Flashings GET TOP DOLLAR FOR YOUR FOUNDRY BYPRODUCTS

Shapiro Metals is a metal recycler with over 100 years experience doing business by **Partnering with IntegritySM**.

We buy:
grindings, spills, slag, dross, flashings which are *valuable scrap metal*.

Eliminate your landfill expense by allowing Shapiro Metals to recycle your foundry waste.

Are you **paying** to landfill your foundry waste?

At Shapiro Metals, we help Stainless Foundries achieve a Zero Landfill Policy, while at the same time maximizing their profit from foundry byproducts. When you grind down your castings, what happens to the grindings you generate? When you skim your furnaces, what do you do with the slag?

If you answer **"yes"** to any of these questions, Shapiro Metals can increase your revenue:

- Do you pay to have your grindings hauled away?
- Do you pay to have spills, slag, and/or dross hauled away?
- Does your scrap vendor haul away spills & grindings for free?
- Filling out manifests in order to landfill your foundry waste?
- Would you like to get paid for your foundry waste on a nickel, chrome, and molybdenum recovery basis?

Our **Lean and Green Scrap Manufacturing** process can both save and earn you money, all the while reducing your carbon footprint:

- We save you money by slashing your current landfill costs.
- We earn you money by paying you top dollar for items you should not be sending to the landfill.
- We reduce your carbon footprint by recycling your reusable material, limiting your landfill contribution, and sending your scrap to the closest of our 7 recycling facilities throughout the United States.

We also **Partner with Integrity** to implement proper accountability for the foundry byproducts you generate. Our **ISO 9001** checks and balances procedures ensure you get paid for every pound of grindings, spills, splatters, flashings, and dross you generate.

At no cost, one of our Lean and Green Scrap Manufacturing experts will visit your facility and assess your current recycling program. If we can help you increase your recycling revenues, decrease your waste expenses, and decrease your landfill contribution, we will present you with a customized recycling system for your foundry.
